Single mount (GMEV-PED) and dual mount (GMEV-DPED) pedestals

## Ideal applications

- For customers who have a BR load center in the garage
- Simple and cost-effective EV charger installation
- For customers with BR load center inside the home
- **Junction box can be up to 150' away from load center**
- For all residential customers when no Eaton BR panel is present
- Hardwire the charger to a dedicated 40A circuit breaker
- For all residential customers
- Ideal for garages with an existing NEMA 14-50 receptacle
- Robust stainless-steel construction for outdoor use (open style parking lots)
- Universal pedestal design that can mount all Eaton AC Level 2 chargers. **All Pedestals are ADA Compliant**
